Crohn's disease and ulcerative colitis are prototypic diseases of inflammatory bowel disease (IBD). The diagnosis of IBD is a challenging one, because the presence of nonspecific symptoms and signs in the upper and lower gastrointestinal tract often cause false-positive and false-negative results. The diagnosis of IBD should be made as soon as possible after onset of symptoms. A combination of clinical examination and simple laboratory tests, including simple stool and blood examinations, is sufficient for making the diagnosis. A single examination of biopsy specimens from the small intestine and colon using endoscopy is often needed, although some cases can be diagnosed and differentiated by upper and lower endoscopy alone, as needed.Q: Most pythonic way to convert a list into a dict of lists I'm new to python and am looking for a pythonic way to convert a list of x/y coordinates into a dictionary, such as: my_list = [[1,2],[3,4],[5,6]] my_dict = { [1,2] : 'a', [3,4] : 'b', [5,6] : 'c' } This is a simplified version of what I need to do, but what is the best pythonic way to get that result? A: A straightforward implementation:

It is vigorous and needs an average of 2.5 m2 of space/plant. Gralzer has a strong, upright growth habit, without any need for pruning. The plant has a 6-cm long raceme with 4-6 open flowers on each flower head. The flowers are yellow, with maroon areas, and grow in a later flowering time than some other varieties. The flowers have a medium length. They are strong in odor and have a sweet scent.Q: Does Application.WorksheetFunction.AverageTimeWorked take into account non-working cells? I have an average calculation that works quite well - but I only want to count the working cells, not non-working cells. For example: Sheet1 12 6 4 12 6 4 --- 1.5 hrs Sheet2 12 6 4 12 6 4 --- 1.5 hrs There would be some pretty big holes in the calculation and I was wondering if there is a way to call 50b96ab0b6

Due to the vastness of the universe, it is difficult to know who is who when it comes to the Internet. That is why the DE Ruprecht Organisation for the protection of the rights of the individual in the Internet space, an association for individuals who are the victims of deceit in internet networks, was established. The aim of the DE Ruprecht Association is to protect individuals in the sense of European law in the internet space. For this purpose, the association pursues legal and technical measures to protect and strengthen the rights of individuals. In addition, the association provides information to victims of Internet fraud and promotes education and communication regarding the protection of the rights of individuals in the Internet space. The association is one of the oldest associations of its kind, was founded on 24. 1. 2003, and since then it has been actively working in order to protect individuals in the Internet space. De Ruprecht is funded by the German Federal Office for Information Technology, the European Commission, the European Union and member organisations. All the services of the DE Ruprecht Association are oriented towards giving individuals the certainty to which they are entitled. www.dr-ueberwachung-de-ueberwachung.de/ Get to know the latest in tech.
